SETU

Brand Refresh
Setu Nutrition.

Colour Palette

Our colour palette is the power of the entire spectrum, but shaped by the benefit or purpose of a given Setu supplement. Blue Light Defense has a gradient that moves away from the titular colour, whereas Deep Sleep is a drowsy dark purple. The versatility of the colours allows us to give a unique ‘visual shorthand’ to every product on our lineup while still keeping it within our overall brand structure.

Primary Color Palette HEX Codes

Total Black	Lilly White	Living Coral
#000000	#FFFFFF	#F37268

Context

Setu has always stood for modern, science-backed nutrition with a human touch. As the brand evolves, the Skin Portfolio takes centre stage in embodying Setu's promise — inner health that reflects outwardly. To mirror this journey, we're reimagining Setu's colour world, evolving it from warm, skin-based tones to a cooler, more dynamic spectrum that visualises both the biology of skin and the science of transformation.

Concept

"From Warmth to Renewal"

A gradient of wellness — from the body's natural warmth to the cool confidence of rejuvenated skin.

This new colour palette is designed as a narrative journey: starting with human warmth, vitality, and natural tones, and moving towards cooler, more functional hues that represent clarity, protection, and performance. It's a visual metaphor for how Setu works — beginning with inner nourishment and culminating in outward transformation.

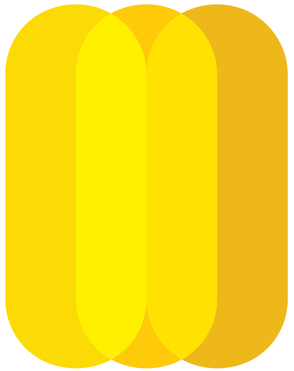
SETU

Setu Skin Colour Spectrum

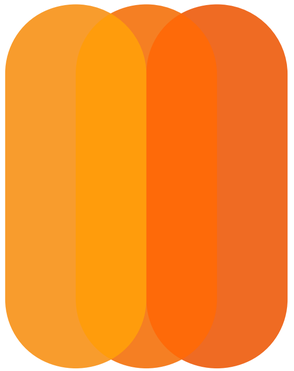
In order to achieve consistency across a wide variety of brand applications, here are suggested colour pairing options for background colours, graphic elements, and text. This is not an exhaustive list but does showcase our recommended pairings.

Skin Portfolio

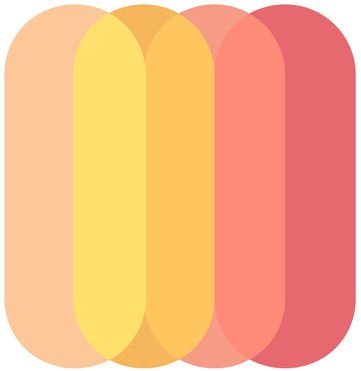
Skin Renew >> Skin Radiance
Skin Youthful >> Anti-Ageing, Hydration
Skin Protect >> Oral Sun Protection
Skin Clarity >> Acne (potentially acne + PCOS)
New products >> Skin + Protein, Skin + Creatine



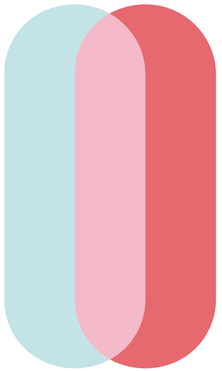
Skin Protect+



Skin Renew



Skin Youthful



Skin Acne Clear
